Wood Veneer Reception Counters with Asymmetric Top

Inspired by the demand for compact reception furniture, we're pleased to offer the Crescent reception desks with an asymmetric shape. Featuring a wood veneered counter top which tapers from 800mm to 240mm, Crescent desks are able to neatly fit into corners and tight spaces with a small footprint.

The veneered top of a Crescent reception counter has an unusual and visually striking fanned radial design. In addition to the pictured Walnut veneer, alternative woods include Oak and Dark Oak, together with Natural Cherry and Cherry 3.

For a dramatic visual effect, the veneered table top of Crescent reception furniture can be teamed with a recessed counter front in a contrasting laminate instead of a matching veneer.

The wood finish of Crescent reception furniture is an unusual quarter-cut veneer. A privacy screen in matching veneer accentuates the dramatic impact of this distinctive grain.

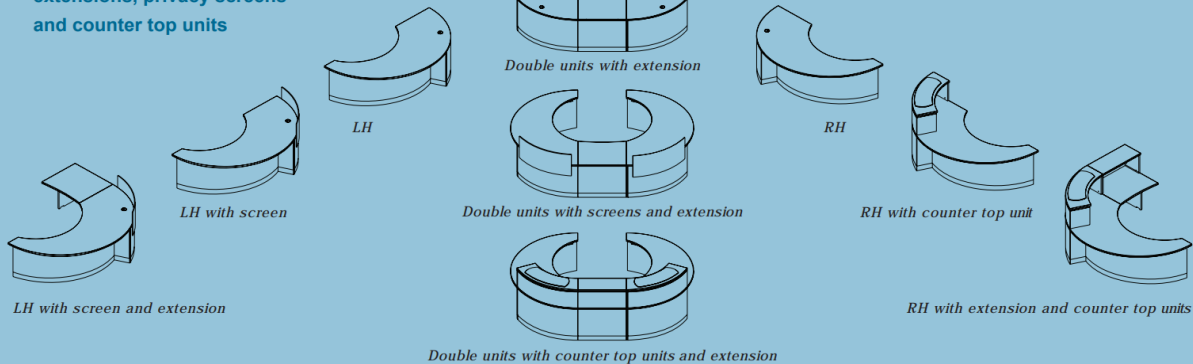

Where there is scope to extend the reception facilities, the modular format of Crescent enables units to be built up to form an impressive focal point for visitors entering the reception area.

Individual Crescent modules can be built up by adding extensions, privacy screens and counter top units

The reverse of a Crescent reception desk is finished throughout with the same wood veneer as the front.

Colour-adjustable "mood lighting", fitted under the desk top, looks particularly effective in reception areas with low ambient light.
